Hot water heat plates are flush mounted. This provides durability and easy access to the heat for the piglets.

Custom manufactured to fit most existing installations.  
Standard sizes are 1' x 4' and 2' x 4'

Dura Trac® Hot Water Heat Plate

Steel pipe welded to the steel plate enables the heat to transfer from the pipe to the plate. The plastic coating over the entire surface acts as an insulator, thereby transferring the heat throughout the plate evenly.

## Dura Trac® Hot Water Heat Plate & Kane Electric Heat Mat

- Flush Mounted for Durability
- Safe Heat
- Uniform Heat
- Easy to Clean

Dura Trac® Clearspan Creep Side and Kane double heat mat for comfortable and uniform heat. Flush mounted for durability.

Dura Trac® Clearspan Creep Side with cast iron center and Kane single heat mat. The heat mat is recessed, energy efficient, easy to clean, and offers comfortable heat. Single and double sizes available. All mats available in 110 or 220 volt.
